

# Ariane BAZAN

August 27, 2021

Ariane Bazan is PhD in Biology (University of Ghent, Belgium, 1997) and in Psychology (University of Lyon, 2009). She is a professor of clinical psychology and psychopathology at the *Université Libre de Bruxelles* (ULB, Belgium) since 2007 and at the University of Lorraine (UL, Nancy) since 2020. She is a practicing psychoanalyst and author of the book *Des fantômes dans la voix. Une hypothèse neuropsychanalytique sur la structure de l'inconscient* (« Phantoms in the voice. A neuropsychanalytic hypothesis on the structure of the unconscious », Ed. Liber, Montréal, 2007). Since 1999, she is engaged in this field of neuropsychanalysis, as a founding member of the *International Neuropsychanalysis Society*, of which she was the liaison officer for Europe from 2014 to 2019. This engagement is also reflected in her research and her teaching expertise and in her editorial commitments. From 2011 to 2020 she was the editor-in-chief of the Psychoanalysis and Neuro-psychoanalysis section of *Frontiers in Psychology* (IF: 2.1) and since 2012 she is on the editorial board of *Neuropsychanalysis*. She is also a founding member of the *Cercle de Neuropsychologie et de Psychanalyse* (CNEP) since 2006, which federates the field in the French-speaking world. She has collaborated in the organization of numerous international conferences in the field of neuropsychanalysis since 2009, and she was the main host in Brussels in 2019, for the 20<sup>th</sup> International Neuropsychanalysis Congress.

## CONFERENCE ORGANIZATIONS

---

### *Organization of national/local conferences*

180. Ghent, Belgium, 30.11.2005, Department of Psychoanalysis, Faculty of Psychology and Educational Sciences, and Department of Philosophy, Faculty of Philosophy and Literature, University of Ghent: Prof. Howard Shevrin (Michigan): "The Dynamic Unconscious. An Experimental Research Program", followed by a debate on 01.12.2005: "Experimental research in (neuro-) psychoanalysis: challenges and controversies".
181. Ghent, Belgium, 01.12.2005, University of Ghent, Post-Academic Education Program "Phenomenology, Psychoanalysis and Neurosciences": workshop organised in collaboration with Gertrudis Van de Vijver and Filip Geerardyn: invitation by Howard Shevrin (Michigan), for a conference on "The Dynamic Unconscious".
182. Ghent, Belgium, 13.12.2006, University of Ghent, Post-Academic Education Program "Phenomenology, Psychoanalysis and Neurosciences": workshop organised in collaboration with Gertrudis Van de Vijver and Filip Geerardyn: invitation by Lisa Ouss, for a conference on "Le Concept de neuropsychanalyse: quelle applications dans la prise en charge des patients' avec lésion cérébrale?" ("The notion of neuropsychanalysis: application for the therapy of brain lesion patients").
183. Ghent, Belgium, 26.04.2007, Department of Philosophy, Faculty of Philosophy and Literature, University of Ghent: Prof. Howard Shevrin (Michigan): "Brain frequencies versus brain modularity: which model fits best a psychodynamic approach of the mental apparatus: an empirical illustration", workshop, followed by a presentation on 27.04.2007: "Psychoanalysis and psychiatric diagnostic."
184. Paris, France, 03.05.2007, Seminary of the APEP (« Association Psychanalyse et Psychothérapie ») and the CNEP (« Cercle de Neuropsychologie et Psychanalyse »), invitation by Howard Shevrin for a conference: "Unconscious Inhibition: Brain Evidence Favoring a Psychoanalytic Understanding".
185. Paris, France, 31.05.2007, Organization of the first conference day of the "Cercle de Neuropsychologie et de Psychanalyse" (CNEP), with the participation of J.-F. Allilaire, D. Widlöcher, A. Beetschen, R. Roussillon, P. Magistretti, B. Dubois, N. Danziger, N. Georgieff, C. Fayada, C. Desrouesné and P. Delion.

186. Ghent, Belgium, 17.05.2008, organisation of a half day of conferences of the “Gezelschap voor Psychoanalyse en Psychotherapie” in collaboration with “Idesça” with Lambros Couloubaritsis and Louis-Georges Papon.
187. Brussels, Belgium, 14.11.2008, Université Libre de Bruxelles, dialogue-debate between Howard Shevrin and Sid Kouider, « L’inconscient entre psychanalyse et neurosciences cognitives: L’inconscient du cerveau est-il l’inconscient du sujet? » (« The unconscious between psychoanalysis and cognitive neurosciences: is the unconscious of the brain the unconscious of the subject? ») , debate organized and introduced by Ariane Bazan and moderated by Axel Cleeremans.
188. Paris, France, 17.11.2008, « Hôpital Necker Enfants malades », Neuropsychanalysis Seminary, Howard Shevrin, « Unconscious inhibition, results of a clinical study with psychodynamic and neurophysiological data », presentation introduced by Ariane Bazan and organized by the “Cercle de Neuropsychologie et de Psychanalyse” (CNEP).
189. Sleidinge, Belgium, 17.12.2008, Psychiatrisch Center of Sleidinge, study day of the “Gezelschap voor Psychoanalyse en Psychotherapie” and “Idesça”: « Le corps dans la psychose » (« The body in psychosis »); invitation by Catherine Morin (Paris, Salpêtrière): « *Que nous apprend la somatoparaphrénie sur l'image du corps et l'objet?* » (“What does somatoparaphrenia teach us on the body image and on the object?”).
190. Lyon, France, 30.06.2009, activities of the Psychopôle Rhône-Alpes, on the occasion of the thesis defense of A. Bazan, organisation of a conference of Pr. H. Shevrin : « The dynamic depths of the Freudian unconscious: can neuroscience provide a model? »; translation by A. Bazan and introduction by Prs. Y. Rossetti and R. Roussillon.
191. Ixelles, Belgium, 11.03.2010, in the context of the interfaculty project « *Normes, Genre et Sexualités* » (« Norms, gender and sexualities ») at the occasion of the 175<sup>e</sup> anniversary of the ULB, study day « La transgression au féminin » (« Feminine transgression »); round table with Antoine Masson, psychiatrist and professor at the UCL, school of criminology and at the FUNDP, department of philosophy, Laurent de Sutter, investigator in the theory of law at the VUB, professor at the FUSL and specialist on the history of pornography in cinema, Alex Lefebvre, Philippe Fouchet and Ariane Bazan, psychology professors at the ULB.
192. Gand, Belgium, 21.02-23.05.2013, series of 6 seminars and 6 doctoral workshop, « Lecture series Critical Neuroscience. Ethics, Philosophy, Politics and Policies », organised by Center of Critical Philosophy, member of Organising and Scientific Committee.
193. Brussels, Belgium, 04.02-21.03.2013, «La liberté. Points de vue et regards croisés», series of 6 seminars for the inauguration of the Research Centers of the faculty of Psychological and Educational Sciences; ULB; help with organization (credit applications and doctoral school PSYCEDUC); host of the conference « Libre de s'auto-engendrer ou la biotechnologie à l'aune de la science-fiction » by Prof. Marika Moisseeff, discussed by Prof. Laurence Rosier, as director of the Research Centre of Clinical Psychology, Psychopathology and Psychosomatics, first inauguration on 04.02.2013 in the presence of the president of the university.
194. ULB, 10.02.2014, « L’impassé, une temporalité de l’inconscient » avec Dominique Scarfone, professeur à l’Université de Montréal, dans le cadre du Centre de Recherche en Psychologie Clinique, Psychopathologie et Psychosomatique (CRPPP) et de l’Ecole doctorale PSYCEDUC.
195. ULB, 25.10.2014, « Le sujet enfin en question. Kant et Lacan, une remise en question de la psychologie » avec Christian Fierens, docteur en psychologie, psychanalyste, psychiatre, dans le cadre de l’Ecole doctorale PSYCEDUC.

196. Brussels, 05.03.2020, study day of the Conseil Supérieur de la Santé: Calmeyn, M., Vanheule, S., Boyce, N., McGorry, P., & Gonon, F. "DSM under scrutiny : why we need to be cautious and how to use it (nevertheless) ?", co-organisation.

### ***Organization of international conferences***

197. Paris, France, 26-29.06.2009, Cercle de Neuropsychologie et de Psychanalyse (CNEP) and the International Neuropsychoanalysis Society, **Tenth International Neuropsychoanalysis Anniversary**: Neuropsychoanalysis, who needs it? Organizing committee and session chair for the session on the Unconscious with Shevrin, Naccache and Gottesman.
198. Ixelles, Belgium, 30.11.2012, Université Libre de Bruxelles, organisation of a international conference, yearly conference of the CNEP (Cercle de Neuropsychologie et de Psychanalyse) : « Psychanalyse et neurosciences aux sources de la pensée. De l'action à la pulsion et de l'intention à l'inhibition. », organized by Ariane Bazan, Anne Boissel, Lisa Ouss and Véronique Delvenne.
199. New York, 24-26.07.2014, **15<sup>th</sup> International Neuropsychanalysis Congress**: « Current Neuropsychoanalytic Research », member of the organizing committee.
200. ULB, Belgium, 29.11.2014, organisation of a international conference, yearly conference of the CNEP, «Towards the neural basis of repression" organized by Ariane Bazan, Nikolai Axmacher and Lisa Ouss.
201. ULB, Belgium, 07.03.2015, organisation of a international conference, yearly conference of the CNEP, in collaboration with the "Centre de Recherche en Psychologie Clinique, Psychopathologie et Psychosomatique" and doctoral school PSYCEDUC, «**Neuroscience and psychoanalysis: Dialogues around repression, conversion, identification and anosognosia**» with Nikolai Axmacher, Lisa Ouss, Stéphane Thibierge et Diana Caine.
202. Amsterdam, 09-12.07.2015, **16<sup>th</sup> International Neuropsychoanalysis Congress**: « Plasticity and Repetition (and other topics) », member of the organizing Committee.
203. Chicago, 07-09.07.2016, **17<sup>th</sup> International Neuropsychoanalysis Congress**: « Other Minds », member of the organizing committee.
204. London, 13-15.07.2017, **18<sup>th</sup> International Neuropsychoanalysis Congress**: « Compulsion to predict: The Development of the Self and Its Disorders », member of the organizing committee.
205. Mexico City, 31.08-02.09.2018, **19<sup>th</sup> International Neuropsychoanalysis Congress**: « Repression and defence », member of the organizing committee.
206. Brussels (ULB), 19-20.07.2019, **20<sup>th</sup> International Neuropsychoanalysis Congress**: « Satisfaction at last. Neuropsychoanalysis on sex, drive and enjoyment », principal host and organizer of the conference.

## RESEARCH THEMES

---

My field of research is 'Lacanian neuropsychanalysis': I rely on Freudian metapsychology (and particularly on the Project for a Scientific Psychology, 1895), the way in which Jacques Lacan has re-read it precisely and critically, its interface with cognitive neurosciences and psycho- and neurolinguistics, and finally on a Kantian transcendental logic. This choice of a crossed psychoanalysis / cognitive neuroscience approach through a theoretical interface framework (*Des fantômes dans la voix*, 2007) and through a shared methodology (priming, evoked potentials) brings me to **an epistemological reflection on the nature of the mental and the logics that distinguish mind and body** (in particular, a historical logic versus a cyclical logic).

See also here on my web page for more: [http://www.arianebazan.be/?page\\_id=9](http://www.arianebazan.be/?page_id=9)

Concretely, experimental research is currently organized as follows:

**(1) Primary and secondary processes, repression and signifier**

- **Taboo words and parapraxes:** Using a slip induction protocol, the Spoonerisms of Laboratory Induced Predisposition (SLIP; Baars et al., 1975; Motley & Baars, 1976), translated into French, we test the relationship between defensiveness and the production of parapraxes. The results would support a psycho- and neurolinguistic model of repression (see Bazan, *Des fantômes dans la voix*, 2007).
- **To think or not to think:** Using the Think-NoThink protocol of Anderson and Green (2001) we try to show the difficulty of inhibiting linguistic associations as a function of personality factors (i.e., of mental structure). We believe that the difficulty of inhibiting phonological ambiguity could be indicative of different mental structures.

We are particularly attentive to an ERP that could reveal this difficulty in dealing with phonological ambiguity, the N320, the Phonological Mismatch Negativity (see e.g., Bazan et al., 2019). We also believe that the efforts at non-processing of phonological ambiguity will show through alpha synchronization (see also Bazan, 2017; Shevrin et al., 2013).

Furthermore, a distinction has to be made between two different defense logics: a more fundamental movement, which defends against the stimulus without its precise identification and which is thought to be the effect of the synchronisation of alpha waves. Research here involves **ERP** measurements (Bazan, 2017). Second, there is secondary repression, which needs precise and accurate identification of the stimulus and which is thought to be the effect of **sensorimotor inhibition** (Bazan, 2012). Research could further be developed with rebound paradigms, e.g. Wegner et al. (2004). The specificity of the lab is to measure rebound both on the level of semantics and on the level of the signifier (phoneme groups).

**(2) Psychosis, puns and metaphors**

- **Puns:** Our results show that the general population solves word games unwittingly. In psychosis there would be a greater insight that the stimulus material forms a pun.
- **New Metaphors:** Our preliminary results suggest that especially in a psychotic (non-clinical) structure, solving new metaphors is difficult.

In the mental health domain, diagnosis is done either on a phenomenological basis (e.g. DSM), in which case diagnosis does not seem to catch the constitutive dynamics of the subject, or by single case analysis ('logique du cas'), in which case diagnosis is more difficult to share in a larger scientific dialogue. Another approach to mental diagnosis is proposed, in which a structural position in language is probed: this position in language is thought to be either on the primary process mode, or on the secondary process mode and/or with a high level of dissociation or integration between both modes and is dynamically sensitive to anxiety and defenses. Our 'linguistic tool box' for this type of diagnostic approach includes **Word Lists**, **Punss**, **New Metaphors** and **TongTwister** and a validated non-linguistic method, the **GeoCat** (see further). Further developments may include adapting existing methods such as Hayling and Jacobi.

### **(3) Sexuality and repetition compulsion**

- **Repetition compulsion and trauma:** This is a line of research initiated with the thesis of Prof. Sandrine Detandt (ULB; *Observatoire du SIDA et des sexualités*) and continued in collaboration with her. We have defended that there is a parallel between the psychoanalytic concepts of *jouissance* and repetition compulsion and the activation of the mesolimbic dopaminergic circuits (NAS-DA) and their incentive sensitization (Bazan & Detandt, 2013, 2015; Bazan et al., 2016). Combining Go/NoGo paradigms, in which response bias for specific stimuli are measured, followed by free association on the same stimuli, assessed by an «Affect-Pulsion» questionnaire (Detandt, 2016) given to naive judges (in order to avoid circularity, Grunbaum, 1984), we assess a coherence between what drives behavior and how this pervades into speech, i.e. we index the 'drive intensity' mobilized by these stimuli. This 'drive intensity' can, for example, be indicative of a traumatic and / or addictive object and / or of a repetition compulsion (see also Detandt, 2016). The idea is that it is the drive intensity that is related to possible psychopathological problems and not the valence, positive or negative, of the stimuli. Thus, what drives behavior, and its repetition, is more fundamentally dependent on excitement, independent of valence – which is in agreement with clinical observation. We are currently interested in populations that have or claim a specific relationship with regard to the sexual domain, either an identity relationship – from asexual to hypersexual, for example – or a professional relationship – sex workers, for example.

### **(4) Primary and secondary processes by the GeoCat instrument**

Linda Brakel of the University of Michigan and her colleagues (Brakel et al., 2000) have developed a very easy-to-use, non-linguistic geometric figure instrument, the GeoCat, which enables rapid 'measurement' of a form of primary and secondary processes. With my team, I redesigned and continued to validate the instrument, which is currently in version 1.3. This instrument is available on request and comes with a user manual ([Ariane.Bazan@univ-lorraine.fr](mailto:Ariane.Bazan@univ-lorraine.fr)).

- **GeoCat and development:** We finalize this study which shows the emergence as early as two and a half years of primary 'attributional' processes and shortly after that of secondary 'configurational' processes. There is a fairly dramatic shift from primary to secondary processes between 5 and 6 years old. After this age there is relative stability between secondary (2/3) and primary (1/3) processes during the rest of life (see also Brakel et al., 2002).
- **GeoCat and autism:** With the colleague, Prof. Lisa Ouss from Necker Hospital in Paris, we collect data by GeoCat in populations of children and adolescents diagnosed with 'Autism Spectrum Disorder' as well as children and adolescents diagnosed with

'Neurodevelopmental Disorder'. This research is open to other potentially interested colleagues.

- **GeoCat and psychic transparency:** We have shown, among others with Julie Antoine-Moussiaux, that there is a resurgence of primary processes of the 'geometric-attributional' type in pregnant women in the second half of their pregnancy (Bazan et al., 2019a), thus supporting Monique Bydlowski's concept of 'psychic transparency' (e.g. Bydlowski, 1991). This research is not continued at this time. However, it would be very interesting to take up this research from a longitudinal angle, to verify whether the resurgence of primary processes during pregnancy turns out to be protective or predictive of mental problems in future mothers after the birth of the child.

Finally, life and events in Belgium led me to engage on a few ethical issues, in particular euthanasia for reasons of mental suffering, which is possible in Belgium. As this list shows, I did not have this theme in my sights a priori, but since some events in 2015 in Belgium, I felt morally obliged to protest by arguing mainly that the law stipulates that the situation must be judged 'medically desperate' to decriminalize euthanasia and that it is not, in my opinion, possible to medically objectify the incurability of mental suffering (see e.g., <https://policyoptions.irpp.org/fr/magazines/mai-2021/laide-medicale-a-mourir-en-cas-de-troubles-mentaux-lecons-de-lexperience-belge/>).
